Professional Profile

IT Support and Infrastructure Technician with experience in telecommunications, network monitoring, incident diagnosis, and technical support. Experienced in structured troubleshooting of connectivity, availability, and performance issues across WAN/LAN environments, with hands-on administration of Windows Server and Ubuntu Server lab environments. Familiar with TCP/IP, switching, routing, DNS, DHCP, Active Directory, PowerShell, VMware, and Linux networking. Strong focus on incident resolution, technical documentation, operational procedures, and continuous learning. Seeking to transition this infrastructure and troubleshooting background into data center operations.

Professional Experience

- Dedicado Telecomunicaciones – Technical Support / Network Monitoring Technician** Dec 2024 – Present
 - Monitored WAN/LAN links and infrastructure using Zabbix, PRTG, SNMP, and Smokeping, identifying availability, connectivity, latency, and performance issues.
 - Diagnosed and resolved infrastructure and network incidents using a structured troubleshooting approach, isolating issues across connectivity, configuration, and service layers.
 - Analyzed alerts, performance metrics, and latency data to support incident diagnosis and service restoration.
 - Configured and administered MikroTik, Ubiquiti, and Cisco networking equipment remotely, reducing unnecessary on-site visits caused by configuration issues.
 - Maintained 100% incident documentation in the ticketing system, supporting SLA audits and recurring-incident analysis.
 - Achieved a first-contact resolution rate above 75% for medium-severity connectivity and performance incidents.
- Kommo CRM – Technical Support Specialist** 2023 – 2024
 - Provided first-level technical support to customers and end users, troubleshooting issues and managing support tickets through resolution.
 - Maintained response SLAs below 2 hours and resolution times below 24 hours while consistently achieving positive customer satisfaction ratings.
 - Configured and customized the CRM platform according to operational requirements and automated repetitive support workflows.
 - Automated workflows representing approximately 30% of incoming requests, reducing manual workload and improving operational efficiency.
- Kroser Centro – Customer Service Representative** 2019 – 2023
 - Provided customer service, payment collection, inventory support, and order logistics in a fast-paced operational environment.
 - Followed operational procedures while developing strong communication, organization, prioritization, and problem-solving skills.

Education

IBEC – Network Technician (2026)
IBEC – Windows Server Administrator (2026)
Cisco Networking Academy – Networking Basics (2025)
IBM – IT Fundamentals for Cybersecurity Specialization (2025)
Jóvenes a Programar – Software Testing Track (2024)
JavaScript – Coderhouse (2022)
Web Development – Coderhouse (2022)
Elbio Fernández School – High School Diploma, Physics and Mathematics (2017)

Technical Projects

Windows Server 2025 Infrastructure Lab

Built and administered a Windows Server 2025 lab with Active Directory Domain Services, DNS, DHCP, File Server, and Print Server roles.

Configured organizational units, users, groups, Group Policy, client systems, and internal networking for a small enterprise-style environment.

Troubleshoot network connectivity, Windows services, permissions, and domain-related issues.

Ubuntu Server Networking & Services Lab

Configured Ubuntu Server networking using Netplan, static addressing, routing, DNS resolvers, and systemd-based services.

Troubleshoot interface configuration, routing, gateway reachability, and service-state issues using Linux command-line tools.

Currently Pursuing

Cisco Networking Academy – Network Technician Career Path

Cisco Networking Academy – Junior Cybersecurity Analyst Career Path

CompTIA – Network+

Technical Skills

Infrastructure & Systems: Windows Server 2025, Ubuntu Server, Active Directory, DNS, DHCP, Group Policy (GPO), PowerShell

Networking: TCP/IP, Ethernet, WAN/LAN, switching, routing, network troubleshooting, SNMP, VLAN fundamentals

Network Technologies: Cisco, MikroTik, Ubiquiti, Cambium, TP-Link

Monitoring: Zabbix, PRTG, Smokeping

Virtualization & Tools: VMware, VirtualBox, Microsoft 365

Programming / Automation: Python, JavaScript, SQL – foundational knowledge

Professional Skills

Structured troubleshooting and incident resolution.

Technical documentation and SLA-oriented operations.

Clear communication with end users and technical teams.

Prioritization in dynamic operational environments.

Adaptability to technical procedures and new technologies.
